- New Home Page of the section launched (give the URL and frequency which it is updated) <http://www.ieeeup.org> . The newsletter is generated through this URL and send to all the members.

B.8 Industry Relations

- **Membership growth and retention:** Excom members approached many industries for renewal and to have the activities in their premise. General visits and promotion for growth & retention
- **Activities for/with industrial members:** We had one Industry meet and planned to have in future. There were 10 industry people came and expressed their viewed and agreed to promote the industry linkage in future too. Many industry people are invited for talk. Industrial visits to the students are also organized.

B.10 Community Activities

- IEEE Social activities (Family day, IEEE day, Engineers Week)”: IEEE day celebrated. SIGHT projects are funded from the R10 and Section are under execution.

PART C - OTHERS

C.1 Relationship with National Societies: Yes. Section is actively involved with the local /national societies, vis. IE(I), IETE(E). Institutions of Engineers (I) Kanpur Centre in association with IITK celebrated 47th World Telecommunication & Information Society Day celebrated on May 17, 2015 at IIT Kanpur.

C.2 Special Events: Section organized the programs for the house wives such as computer usage, self defense against the eve teaser etc.

C.3 Problems to be Anticipated: The membership retention is one of the major concerns and Uttar Pradesh Section is providing all the helps to the members to continue their membership.

C.4 Best Practices of your section (which you would like share with other sections for the benefits of members): Various initiatives are taken such as

1. Approaching the industry and the Institute where limited members are there for forming the branches and chapters.
2. Organizing the leadership workshops for the volunteers of Section.
3. Organized mini-POCO to increase the awareness in quality paper and conference organization.

PART D - GOALS AND PLANS

D.1 Continuation of Project/Activity in Progress and Their Implementation Plans:

As in previous years, our basic goal remains one of providing an interesting and professionally exciting set of technical activities for our members so that we can help in promoting their professional growth. We will continue to hold as many good quality technical meetings to achieve this goal and would like them to be held in a distributed

manner in the geographical section represented by us, i.e. the U.P. Region. In the U.P. Region, wherever we have a sufficient concentration of members or where we feel that IEEE membership can be promoted, we have been organizing and would like to continue to organize technical activities (or help in organizing them). This has helped and will help further in our goal of promoting IEEE membership within the engineering professionals and students in this area.

Projects on WIE and SIGHT are done in last year and the same will continue in years to come. YP is to be formed in this year.

D.2 Goals and Future Plans

We will continue to promote other regular technical activities in the U.P. Region by providing joint sponsorship, support and publicity to conference and symposia organized in and around this region. We continue to encourage our members to promote such activities and assist them in organizing these as far as possible. We intend to use our communication channels (email, WWW web page, newsletter etc.) to publicize these activities so that our members can gain maximum advantage from them. We also generally request the organizers of these activities to charge a reduced registration fee for IEEE members so that we can then use this to promote the benefits of IEEE membership.

We plan to encourage student membership by organizing activities focused on students' needs. We plan to organize useful panel discussions as has been done in the past. We also plan to organize site visits to local industrial organizations, power stations and laboratories for them. We are considering starting some lectures and group discussions, which can help in providing career guidance and counseling to students. We wish to promote better industry academia ties in our region and the first two special initiatives are planned accordingly.

Various activities are planned such as

- (a) Increase in industry members with various industries meet in the IEEE Uttar Pradesh Section conference.
- (b) Formation of student branches at several potential institutes and providing the guidance to organize the various activities.
- (c) Implementation of invited lectures with DL and local speakers
- (d) Many student related activities
