

Robotics for Healthcare

R10 Robotics Competition 2022

Deadline 15 August 2022

R10 Robotics Competition Project# 4 is an opportunity for all IEEE Student members (Undergraduate and Postgraduate) and Young Professionals (YP) in Region 10 to demonstrate their innovative robot projects designed for healthcare and humanitarian purposes and compete at an international level.

Who can Participate

Project# 4 of the R10 Robotics Competition is open to IEEE Student members and Young Professionals (YP) in R10. Non-members must join the IEEE to be eligible to participate in the competition.

What can be submitted?

Submissions should be of innovative and useful robotics and automation technology applicable to healthcare and/or humanitarian purposes.

- Robots designed to assist with any medical situation or requirement will be considered as a healthcare robot.
- Robots designed to assist or deal with natural disaster, mitigate climate change threats, eliminate/reduce human sufferings or improve common person life will be considered as a humanitarian class robot.
