2023 Priorities

- **Support for Local Activities:** The Region needs to recognize and share the best of Section activities through an initiative that helps to capture activity (meeting, guest speakers, workshops, etc.) in one section that can be used in another.
- **Financial Transparency and Growth:** Regional funds support all members, and members should be easily able to see how funds are being, and planned on being, used. Due to decreased membership, the Region needs to investigate additional sources of income, including the formation of an annual regional conference.
- **Engagement of Students and Young Professionals:** Regional and local units need to expand how we engage with Student Members and Young Professionals. The Region will continue to grow the successful Regional Student Activities Conference, while supporting and forming additional activities with support of higher-grade members.
- **Leadership and Volunteering Opportunities:** Outline and establish a leadership pipeline for current and future volunteers in local sections
